## Design

The Hallite 834 wiper is designed to snap into a standard housing and provide reliable medium duty dirt exclusion. The proportions of the wiping lip ensure that it remains in contact with the rod surface to remove all deposits of mud and other forms of contamination except for those found in the heavy duty environment such as steel works and cement factories.

The inside diameter of the seal is provided with ribs to prevent the possibility of blow out due to pressure trapping of the main rod seal.

The Hallite ${ }^{\circledR} 834$ is precision moulded in Hythane ${ }^{\circledR} 181$ for maximum wear resistance.
Part numbers suffixed by $\dagger$ indicate housing sizes to meet ISO 6195E.
